Powerful Receiving in an easy to use interface

- * Chain of Custody
- * Dashboard Metrics
- * Recipient Notifications
- * Enterprise Management
- * Delivery Routing
- * Proof of Delivery
- * Management Reports

Metric reporting across all locations. Find out how much you are receiving, delivering and staff performance.

Ensure package delivery with signatures, monitor KPI's and events for full chain of custody visibility.

Power Package Tracking

Completely customizable solution with configurable processes, screens and labels. Analyze factors including delivered, non-delivered packages and delivery courier exception reports. Full chain of custody visibility.

Secure Cloud Hosting

A hosted enterprise product that will not drain your IT resources or capital expenditure budget. We offer a secure encrypted solution with automatic product upgrades that won't disrupt your business operations.

Automated Custom Notifications

Improves the deliverability of packages by providing customizable email notifications. Create templates and stage for immediate processing or in batch mode for different scenarios such as perishable items.

Centralized Software Solution

Centralized data allows management of information to properly monitor package deliveries from any computer. Our scalable architecture can support Intelligent Lockers, Routing, Inventory and Multi-Carrier Shipping.
