

INTELLIGENT LOCKER SYSTEM

| Features | Benefits |
|-------------------|---|
| Access | 24/7 availability |
| Secure | 24/7 Locker Surveillance |
| Mobile | Contactless package pickup |
| Integration | Complete Chain of Custody with Brynka solutions |
| Reporting | Create Ad-Hoc reports |
| Proof of Delivery | Photo and Signature capture |
| Modular | Build to your needs |
| Branding | Custom branding available |
| Indoor/Outdoor | Provide complete access for your recipients |

With the Brynka Intelligent Locker System (ILS), receive packages and deliver into an electronic locker. Notifications are sent to the recipients with a pin code or utilize a mobile device to pick up their items at their convenience for contactless retrieval.

Once picked up, Brynka is updated with the delivery information. Browse package history, export proof of delivery, create data exports with our ad-hoc reporting tool and measure mail center performance with our management reports.

- Alleviate package clutter in the Mail Center
- Save time and money by simplifying package handling
- With BrynkallS, Receive all packages to secure lockers and recipients can pick them up at any time
- Locker Branding
- Customizable locker sizes
- Scalable for future package growth
- 24/7 Live Video Surveillance
- Innovative solutions beyond lockers

Reduce labor costs, gain space and add a new layer of security in the Mail Center with BrynkallS.
