brynka VM

VIRTUAL MAIL

Features	Benefits
Scan Mail	Scan all incoming mail and email to recipients. They can choose what to do with their mail item.
OCR	Work process rules determine the "right" recipient.
Notifications	Email notifications with images of the scanned mail item will be delivered to each recipient. They can then choose to trash, open-scan contacts, deliver, or pickup mail items.
Reporting	Several Dashboards to track Mail and Recipient metrics with SLA's.
Hardware	Works with low-end to high-end scanning devices.

brynka

With the Brynka Virtual Mail solution, powered by Image Architects, make Mail Deliveries easy and efficient!

- Automatically send a branded email showing recipients what they received
- Don't deliver the physical letter because they might not want it
- Hyperlink to an image database to show recipients the mail piece
- Compliance Departments can keep an eye on important mail
- Significantly reduce staff deliveries

Maximize your mail delivery process!

Provide an Accountable Mail Tracking System.
